## Sammendrag

---

I am a Ph.D. holder in Materials Science with 10 years of experience. My research expertise lies in two-dimensional materials, particularly titanium carbide compounds. In addition, I have 6 years of teaching experience as an assistant professor, where I delivered lectures in various fields of physics. I also have programming skills in Python, Javascript, CSS, and HTML.

## Erfaring

---

### Assistant-professor

International university of information technology

September 2019 - April 2023 - Fulltid

Almaty, Kazakhstan

As an assistant-professor in Physics and Electrical Circuit Theory, I was responsible for delivering lectures and conducting seminars for undergraduate students specializing in Information Technology. My role involved teaching intermediate-level courses in Physics 1, Physics 2, and Electrical Circuit Theory. I played a key role in providing a solid foundation in these subjects, fostering a deep understanding of the principles and their applications in IT.

## Utdanning

---

### Doktorgrad

Materials Science and Engineering

Kazakh National University

September 2014 - Mai 2018

### Master (eller tilsvarende)

Materials Science and Engineering

Kazakh National University

September 2011 - Juni 2013

### Bachelor (eller tilsvarende)

Materials Science and Engineering

Kazakh National University

September 2007 - Juni 2011
